

## Self adhesive beeding

Product	Code No.	Sample	Applications
Polythelene crosslink foam single side adhesive	SB-01		Weather striping for sealing gaps in doors and windows, as strips and gaskets in assembly operations, duct seals and sound dampering pads, gaskets in electrical, electronic and various applications.
Polythelene crosslink foam double side adhesive	SB-02		For structural glazing, interior decorations, fancy products, wall stickers etc.,
Nitrile Foam	SB-04		Used as superior thermal insulation such as pipe insulation, fittings insulation, ducting insulation in industries like air conditioning, automobile, solar water heater etc.,
VHB Tape	SB-05		Used in automotive trim attachment, signs, graphics, printing, construction and electronics.
Masking Tape	SB-06		For spray paint masking, pcb making etc.,
Surface Protection Tape	SB-07		Protection of anodized/acrylic coated metal window frames, protection of machine parts, printed circuit boards, plated surfaces and stainless steel finished on automobiles.

## Self adhesive beeding

Product	Code No.	Sample	Applications
Glass Etching Tape	SB-08		Used for Glass designing.
TAT (Transfer Adhesive Tape)	SB-09		Used for lamination to all foams for gasketing & sound control, product assembly etc.,
Duct Tape	SB-10		Used for sealing joints in metal and plastic ducts, sealing gas fire closure plates, electricals.
Polyester Tape	SB-11		For high voltage insulation in transformer, chokes, coil winding, photo labs etc.,
Kapton Tape	SB-13		For very high voltage insulation.
Aluminium Foil Tape	SB-14		For duct rap, thermal insulation, vapour sealing etc.,

## Self adhesive beeding

Product	Code No.	Sample	Applications
Double Side Tissue Tape	SB-15		For sign & display boards, excellent adhesion to metal glass, films, papers, high performance for splicing plastic & other continues process, bonding in circuit boards etc.,
Floor Marking Tape	SB-16		Used in factory demacration areas, first aid points, hazardous areas.
