

## Silicone Transparent Tubings

Silicone Transparent Tubings are used in Food, Pharma, Chemical, Electrical, Heavy Engineering, Medical, Thermal Power Stations, and PSUs. We present silicone transparent tubing which can resist temperatures from -116°C to + 315°C. These Transparent Tubings are made from 100% pure Silicone Rubber. These Tubings are manufactured under strict manufacturing condition facilities. We have supplied this product to all industrial sectors across India.

Salient Features:

- Completely Non-toxic and excellent heat resistant from -116°C to + 315°C.
- Completely Transparent and Flexible.
- Odourless and can withstand many drugs.
- Avoids bacterial growth.
- It replaces latex and PVC tubes.

Applications:

- In Injection and Vial Filling Machines.
- In Peristaltic pumps.
- For transfer of oral liquids like syrups, tonics etc.
- For transfer of oral ointments, creams
